

Library Management System

6 Major functions include :

1 Cataloguing

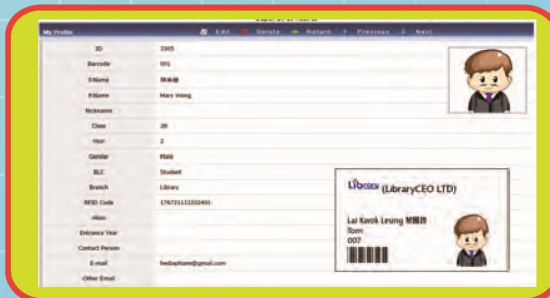

Manage book data (users can use Excel/MARC to export and import book data).

2 Circulation

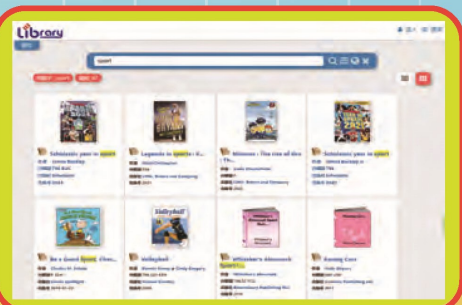

The procedures for managing book borrowing and returning include: borrowing/returning/reservation/renewal/penalties, etc.

3 Patron Management

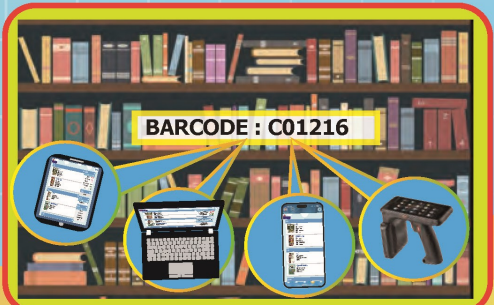

Manage reader data (users can use Excel to export and import reader data).

4 OPAC

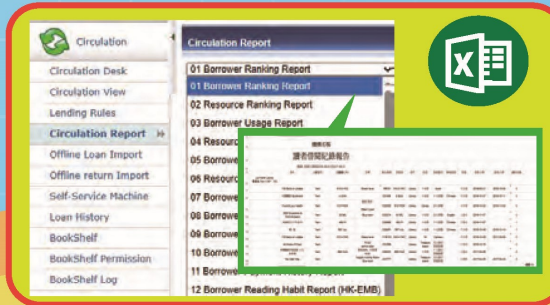

Manage reader access to books and other functions, such as viewing Top 10 Lists, allowing renewals, making reservations, viewing current borrowings, and checking borrowing records, etc.

5 Stock taking

To stock take the books in the library (users can use Excel to import data for inventory or use an RFID scanner).

6 Reporting function and message notification

LibraryCEO can filter out different types of reports such as borrowing statistical reports, current borrowing reports, fine reports, etc...(All reports are exported in Excel format).

LibraryCEO system will automatically send different types of email messages to every reader, for example: overdue readers, or readers who need reminders before expiration, etc...

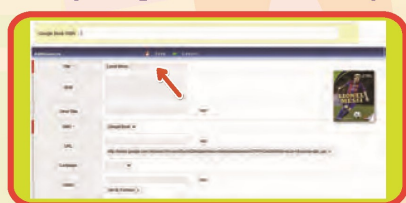

Other extra functions include :

7 LibraryCEO Cloud

Secure, reliable, and high-performance server management solutions save organizations valuable time and costs.

8 LibraryCEO (Google Book function)

Users only need to scan or enter the ISBN number, then the book information will be automatically put into the system including the book cover (users can also export the information to Excel for editing purposes).

9 LibraryCEO App (Supports: Android or iOS mobile phones)

(For teachers, parents, and students)

Users can receive overdue notifications, make reservations, renew books, search for book information, check Top 10 lists, view new book recommendations, etc.
